

## AGRICULTURE PRODUCTS

AG-FORCE IV (Wetting Agent) A substance that reduces the surface tension of a liquid, causing the liquid to spread across or penetrate more easily the surface of a solid.

AG-Force IV can make a significant difference in the moisture quality of a soils profile. This in turn can have an integrated effect on the health of the soil life, improved oxygen and water movement and improved nutrient availability.

- AG-Force IV eliminates soil water repellency
- AG-Force IV enhances movement and infiltration of water in the rootzone
- AG-Force IV helps maximize nutrient availability in soil
